

# Parasites and Allergies – Similarity of Symptoms

by Simon Yu, M.D.

I have compiled common symptoms associated with parasite infection and allergy related problems. You will be surprised to see the similarity of the symptoms. Many symptoms that indicate a parasite infestation also indicate allergy problems and vice-versa as shown in the first grouping in each column below. The symptoms in the second grouping in each column don't overlap with the other condition but can influence the other condition as if running a parallel course for both problems.

<b>Parasites</b>	<b>Allergies</b>
Asthma	Asthma
Bloating	Bloating
Brain fog	Brain fog
Cramps	Cramps
Diarrhea	Diarrhea
Fatigue	Fatigue
Flatulence	Flatulence
Gallbladder attack	Gallbladder attack
Headaches	Headaches
Immune deficiency	Immune dysfunction
Irritable bowel syndrome	Irritable bowl syndrome
Mucous secretion	Mucous secretion
Muscle problems	Muscle pain
Ulcerative colitis	Ulcerative colitis
Weight gain	Weight gain
Weight loss	Weight loss
Anal itching	Abdominal pain
Appendicitis	Acne
Brain abscess	ADD/ADHD
Cancer	Anorexia
Cardiomyopathy	Bedwetting
Constipations	Behavioral changes
Coughs	Bronchitis
Dermatitis	Canker sores
Eczema	Celiac disease
Fever	Conjunctivitis
General pain	Ear Infection
Hallucination	Edema
Indigestion	Hives
Inflammations	Hypoglycemia
Insomnia	Irregular heartbeat
Intestinal bleeding	Irritability
Liver dysfunction	Itching
Mal-absorption	Joint pain
Memory loss	Low back pain
Nausea	Seizures
Peritonitis	Sinusitis
Poor coordination	Skin rash
Pulmonary fibrosis	Urinary problems
Uro-genital dysfunctions	Urticaria
